

Advance Random Draw

8 Team IHSA State Finals Rotation

(Based on Olympic order with four events running concurrently)

Rotation	Vault	Uneven Bars	Balance Beam	Floor Exercise
1 st	A	D	C	B
2 nd	B	A	D	C
3 rd	C	B	A	D
4 th	D	C	B	A

Step 1 Determining Team Placement (completed by random draw at IHSA Office)

Winner Hinsdale (Central) Sectional	C
Winner Glenview (Glenbrook South) Sectional	B
Winner Hoffman Estates (H.S.) Sectional	D
Winner Wheaton (W. Warrenville South) Sectional	C
At Large #1 (in alpha by city)	A
At large #2 (in alpha by city)	D
At large #3 (in alpha by city)	A
At large #4 (in alpha by city)	B

Step 2 Insert Individuals into the Rotation (completed by meet manager)

This step is similar to regional and sectional meets. After the number of individual qualifiers there are for event has been determined, the manager will insert them into the rotation in order to maintain balance for each performance group.

Step 3 Determining the Order of Performance (completed by the IHSA Office)

Once all the performers, both teams and individuals, have been determined for each performance group, a random draw will occur. This draw shall occur for each performance group for each rotation on each event. For each group, the names of the schools involved in the group will be randomly selected one at a time. The order of selection will determine the order of performance within that rotation. Again, this selection process needs to occur for each group for each event, thereby insuring a sense of randomness to the process and keeping one team from always following another.
