

# Scorekeeping Instructions with Libero Serving

The Scorekeeper shall:

1. If the libero serves, they may serve in only one serving position. The scorekeeper designates what serving position the libero has served by placing a triangle around the number in the Serving Order column.
2. All points earned as a result of the libero serving are marked with a triangle.
  - a. In the line score in the serving position, place a triangle around each score earned from the libero serve.
  - b. In the running score, draw a triangle around each score earned from the libero serve.

Example: In the partial game illustration below, we see the home team has designated a libero (#2). If the libero serves, the scorekeeper marks the Serve Order with a triangle. In this example, we see the libero has stepped in for Player #1 and served points 7 and 8. Thus, the 4<sup>th</sup> Serve Order is marked with a triangle and any served points by the libero are marked in two places (the line score and the running score) with a triangle. All other points are marked as (a) loss of rally points (points 3, 4 and 6) with a box in both the line score and running score and (b) served points by other than the libero (points 1, 2 and 5) are written in the line score and slashed in the running score.

NOTE: If both teams are using the libero player, this scoring will be done for both teams by the scorekeeper.
