---

---

*The Meet Referee/Starter and Meet Manager have the authority to postpone or suspend a meet due to inclement weather. Inclement weather includes but is not limited to thunder, cloud to ground lightning, hail, and tornados. Wind, rain, and cold temperatures do not constitute inclement weather. The following protocol should be followed in regard to circumstances surrounding inclement weather.*

---

- A. If, prior to the start of the first race, inclement weather is in the area, and it appears that it will interrupt a race, wait until the inclement weather has cleared (ensuring that there has been no thunder or lightning for at least 30 minutes) before starting any race. It is in the best interest of everyone not to start the race if inclement weather appears imminent.**
- B. If inclement weather occurs after the start of a race, three long blasts of an airhorn shall be used to notify coaches and runners.** Coaches, umpires, and meet personnel should then begin getting runners off the course and into a safe area. If there is thunder or lightning, seek shelter in a bus, vehicle or nearby shelter. Do not go under a tree or under tents with metal poles. Meet Managers should identify and communicate to coaches any nearby safe areas prior to the meet taking place.
- C. If the race is suspended with the lead runner less than half-way through the course, then there will be a one-hour rest period.** After the rest period, the same runners will go back to the starting line and start the race from the beginning. The Meet Referee and Meet Manager should establish the half-way mark prior to the meet and communicate this information to coaches in advance.
- D. If the race is suspended with the lead runner more than half-way through the course, then there will be a two-hour rest period.** After the rest period, the same runners will go back to the starting line and start the race from the beginning.
- E. If the majority of the runners have finished and the race has to be suspended due to inclement weather, the results will stand if the appropriate number of team and individual qualifiers can be determined per the Cross Country Terms and Conditions and the last runners who have not finished do not affect the results of the top teams or individual qualifiers that advance.**
- F. If the Meet Referee and Meet Manager feel that a race cannot be completed on the scheduled day, then they must contact the IHSA Cross Country Administrator for further direction. When it is safe to resume, every effort to complete the race on its scheduled day should be made.**

### Awards

Approximately 2 weeks prior to your meet, the awards for your meet will arrive from A&M Products. Please inspect awards upon arrival from A & M Products, contact Andy Austin IMMEDIATELY (aaustinaandmproducts.com) for awards damage. Most awards can be replaced prior to the level of competition, if inspected upon arrival. Ties: If a team tie occurs for the first place, NFHS Rule 8-2-4 will be used to break the tie. (Compare the 6<sup>th</sup> place runner from the tying teams).

Sectional

Individual: Medals will be awarded to the first ten (10) placing runners.

Team: A plaque will be awarded to the first-place team.

Ties: If a team tie occurs for the first place, NFHS Rule 8-2-4 will be used to break the tie. (Compare the 6<sup>th</sup> place runner from the tying teams).

- Results Uploaded to athletic.net: Meet Managers must ensure that results are uploaded to Athletic.net by midnight on meet day.
- Financial Report: File Interactive Financial report via the internet on the IHSA Schools Center Web Site.

### Flags:

- The course should be marked by signs or flags clearly visible for a distance of 100 feet. These flags should be at least 6 feet above the ground.
- Flag Designations:**
  - a red flag indicates a turn to the left;
  - a yellow flag indicates a turn to the right;
  - a blue flag indicates a course straight ahead.

### Lines:

- Turns and guidelines should be indicated by a line on the ground drawn with White Athletic Field Marker (Non-Caustic). The NFHS allows that the course be marked by a set of two parallel lines if meet management chooses to do so. Remember that if flags are also used in conjunction with two lines, it is always the flags that take precedent when defining the actual course. The time and effort put into the marking and placing of proper guides on the course will result in a better understanding by the coaches and runners.

### Safety:

- It is recommended that in the interest of safety:
  - use rigid poles that are padded;
  - place the poles near natural boundaries such as trees and bushes;
  - have an official stationed by the flags and poles;
  - protect all metal chute posts with padding or wrap.
- Obstructions on the ground that might cause tripping should be removed from the path of the runners. These obstructions may result in serious fall and possible injuries.

### Starting Line:

- The starting line should be placed so that there is a long straight-away before a turn is reached. A minimum of 300 yards should be available to the runners before there is a gradual narrowing. This allows the runners to become spread out before the turn. The straight-away at the start should be wide enough to accommodate all the teams and individual runners.

- The starting line should be drawn with White Athletic Field Marker (Non-Caustic), 2 inch wide, and placed at a right angle to the direction for the starting straight-away. It should extend a distance that provides that starting boxes are between 6 and 8 feet wide. If a number of single entries are in the meet, additional space on the starting line should be provided.

### Finish Line:

- The finish should be at the end of a straight-away extending a distance of at least 150 yards. The finish line should be at the "mouth" of a rope funnel leading into a rope chute. The mouth of the funnel should be at least 15 feet wide. The chute should be 15-foot wide at the mouth and narrow down at least 15-25 deep. Give the runners ample space in the chute. The rope should be supported by stakes place approximately 20 feet apart. The stakes at each end should be driven in to ground or set in post holes. They should be solid enough to permit the rope to be drawn tight. They should be padded. **It is a requirement to have at least one camera set up to capture the finish of each regional/sectional race.**

## Diagram of the Chute

**Length of chute:** 15-25 feet or more **Width of chute:** 15 feet down to 30 inches **Height of rope:** 40 inches

**Width of chute mouth:** 15 feet

Posts at the finish line should be well padded.

Rope on each side of finish line for a distance of approximately six feet beyond the finish line should be wrapped to prevent rope burns. Posts should be placed approximately 20 feet apart.

## Officials Needed on The Course/Meet Officials Duties

Make an inventory of the help needed and then proceed to organize the help. Do not hesitate to call upon other schools assigned to your meet to supply workers.

All officials and workers should be made thoroughly familiar with the duties and responsibilities. Typewritten instruction sheets, prepared in advance and placed in their hands, will remove the necessity of last-minute instructions.

### Meet Referee (IHSA Assigns)

1. place the teams in proper position on the starting line after they have drawn for position by lot;
2. start the race;
3. act as referee of all decisions in the conduct of the race;
4. disqualify any runner for unsportsmanlike conduct or for any flagrant violation of the rules;
5. instruct the runners before the start of the race.
6. The referee must review the video of the finish of each race to score the event.

### Clerk/Starter (IHSA Assigns)

1. assist the Starter;
2. assist at the starting line

### Finish Judge (Host Assigns)

1. stand at the finish line and determine the proper order of contestants as they cross the finish line; have final authority on the order of finish.

The Finish Judges and the Chute Judges are responsible in seeing fairness prevail. It can get hectic when a jam-up occurs. The video cameras prevail most creditably in these circumstances. Use another official (assistant referee) to read the videos should a conflict arise. (This eliminates any time delays for the next race.)

### Chute Inspector (Host Assigns)

1. supervise the runners in the chute. Any runner after crossing the finish line is entitled to his/her position in the line;
2. assist in every way possible to see that each runner is properly checked in the order of his/her finish.

The **“CHUTE” INSPECTORS** gather at the Finish Line and go over all finish procedures. Nothing is left to chance — the officials should be experienced in their duties. Track and Field officials registered with the IHSA are preferred.

### Caller (Host Assigns)

1. be located in such a position at the finish line that he/she can clearly see the number of each contestant as they cross the finish line;

2. call the numbers of each contestant in the order of their alignment at the finish. The caller's voice should be of a quality that can be clearly understood by the checkers recording the finish. In the event more than one finisher crosses the finish line at the same time, the Finish Judge will determine the placing of the runners.

### Procedures at the “End of the Chute”/Timing

1. You may consider using a “Caller” with a cellular phone that reads the competitors number when they reach the end of the chute. The cellular connects with an official inside the school building (where it is warm and quiet). This is the “Primary Method” for scoring.
2. Back-up systems are as follows:
  - a. The “Caller” has a tape recorder that identifies finishers.
  - b. Assistant to the “Caller” writes down the competitor's number.
  - c. Video Review in some form is required at all regional and sectional meets.
3. At the State Final, the “Timing Tape” is a back-up taken and recorded.

### Checkers (Host Assigns)

It shall be the duty of the Checkers to record the order of the finish as given to them by the caller and/or finish judge(s). In case of a conflict in records, if two are in agreement, their records shall be recorded as official. If an agreement cannot be reached, the final decision shall be made by the referee.

### Course Umpire/Inspector (Host Assigns)

1. observe the conduct and course of the runners during the race;
2. record the numbers of contestants that are in violation and report the infractions to the referee.

**It shall be the duty of the Timers to time the winner of the race.**

### Numbers (Host Provides)

Numbers may be prepared from sign cloth, white window blind material or any other material durable enough to prevent safety pins from pulling out.

The manager should assign a number to each team and each runner on the team should be assigned a number in the order of his/her ability.

#### Example:

A team is assigned number 3. Then each runner on the team will bear the team number and, in addition, his/her number on the team. The members of the team, in order of their ability, would bear the following numbers on both the front and back:

3-1, 3-2, 3-3, 3-4, 3-5, 3-6, 3-7

This system of numbering simplifies the scoring at the end of the meet.

Schools & Managers**

# Emergency Action Plan (EAP)

In accordance with By-law 2.150, a school shall have on file for each student that participates (including practice) in interscholastic athletics a certificate of physical fitness issued by a licensed physician, physician's assistant or nurse practitioner as set forth in the Illinois State Statutes not more than 395 days preceding any date of participation in any such practice, contest or activity. As this By-law addresses pre-participation certification only, there is not a guideline or By-law in place to address release to interscholastic activity following an injury, with the exception of head injury/concussion. With the understanding that schools throughout the state have different needs and services available to them, this document was produced to provide guidelines on an athlete's return to activity following an injury.

Each school should have a written Emergency Action Plan (EAP) in place to address medical emergencies among athletes, staff, officials, and spectators, regardless of severity, occurring during a practice or competition. The plan should also address severe weather, fire, electrical failure, bomb threat, criminal behavior, or other possible emergencies. This plan should be developed to address the unique needs of the individual sport and venue.

EAP's should consist of the following components:

- Personnel
- Communication
- Equipment
- Emergency Medical Care
- Player Medical Information
- Game-day Responsibilities (includes appropriate sideline preparedness)
- Catastrophic Incident Plan

While each school's sports medicine/medical service needs and availability are different, guidelines should also be developed to assist the coaching staff on what injuries should be allowed to return to competition without a medical release. It is not practical to identify every situation or injury; however the following guidelines should assist the school/coaching staff on determining if the athlete should be allowed to return to activity without a release.

1. No swelling or deformity.
2. No headache, nausea, blurred vision, tingling, numbness or sensory changes.
3. Symmetrical (equal to the other side) joint range on motion and strength.
4. Ability to bear weight, without a limp, if injury occurs to the lower body.
5. Ability to complete full functional sporting activities without compensation.

Please remember that the majority of high school athletes are a minor. If there is a question as to their injury and ability to participate, the parents/guardian should be consulted.

Athletes that are unable to meet the above criteria should be encouraged to seek medical treatment prior to return to inter-scholastic activity. Those athletes that seek medical treatment should be required to provide a written medical release indicating their ability to participate. Without obtaining this release, the school may assume legal liability if the athlete is allowed to participate in activities not permitted by their medical provider.

A proper plan establishes accountability, should be comprehensive, yet flexible, practical, and easily understood. The written EAP must be revised, approved, distributed, and should be rehearsed regularly prior to every athletic season. The athletic department, administration, and sports medicine team share the responsibility to establish, practice, and execute the EAP.

A sample venue-specific is included as a part of this document, which was developed from portions of the third and fourth editions of National Federation of State High School Associations Sports Medicine Handbook. Persons interested in purchasing this handbook can do so at the following location: <http://www.nfhs.org/resources/publications/>

# IHSA Severe Weather Safety Guidelines

To be used during any IHSA state series contest

When thunder is heard, or a cloud-to-ground lightning bolt is seen, the thunderstorm is close enough to strike your location with lightning. Take shelter immediately.

Lightning is one of the most consistent and underrated causes of weather-related deaths or injury in the United States. Nearly all lightning-related injuries occur between the months of May and September and between the hours of 10:00 a.m. and 7:00 p.m. Therefore, the greatest concern for injuries in an outdoor contest appears to be during that time, though it can happen any time of year.

It is essential that local managers, competing schools, and contest officials establish dialogue in advance of contests or events to ensure that all involved are aware of what the plan will be in determining whether or when to suspend play. Local managers are encouraged to share their plan with competing schools and assigned contest officials prior to the start of the tournament/event.

If competing schools have portable devices they will be bringing to a contest/event and/or have specific policy or directions from their administration that they must follow, the school must communicate those to the tournament manager. Tournament managers must know the policies of each school assigned to their tournament or event prior to its start.

## PROACTIVE PLANNING

- 1) Assign staff to monitor local weather conditions before and during practices and contests
- 2) Develop an evacuation plan, including identification of appropriate nearby safer areas and determine the amount of time needed to get everyone to a designated safer area:
  - a. A designated safer place is a substantial building with plumbing and wiring where people live or work, such as a school, gymnasium or library. An alternate safer place from the threat of lightning is a fully enclosed (not convertible or soft top) metal car or school bus.
- 3) Develop criteria for suspension and resumption of play:
  - a. When thunder is heard, or lightning is seen\*, the leading edge of the thunderstorm is close enough to strike your location with lightning. Suspend play for at least 30 minutes and vacate the outdoor activity to the previously designated safer location immediately.
  - b. 30 minutes rule. Once play has been suspended, wait at least 30 minutes after the last thunder is heard or lightning is witnessed\* prior to resuming play.
  - c. Any subsequent thunder or lightning\* after the beginning of the 30-minute count will reset the clock and another 30-minute count should begin.
  - d. When lightning-detection devices or mobile phone apps are available, this technology could be used to assist in making a decision to suspend play if a lightning strike is noted to be within 10 miles of the event location. However, you should never depend on the reliability of these devices and, thus, hearing thunder or seeing lightning\* should always take precedence over information from a mobile app or lightning-detection device.  
\*- At night, under certain atmospheric conditions, lightning flashes may be seen from distant storms. In these cases, it may be safe to continue an event. If no thunder can be heard and the flashes are low on the horizon, the storm may not pose a threat. Independently verified lightning detection information would help eliminate any uncertainty.
- 4) Review the lightning safety policy annually with all administrators, coaches and game personnel and train all personnel.
- 5) Inform student-athletes and their parents of the lightning policy at start of the season.

## EVACUATION PLAN

**Safe Areas: All personnel, athletes and spectators should be clearly informed of available safe structures or shelters in the event a thunderstorm approaches. A safe structure is any fully enclosed building frequently used by people. In absence of that – athletes and spectators should go to any vehicle with a hard metal roof. Roll up the windows and do not touch the sides of the vehicle. If no safe structure or vehicle is available, find a thick grove of small trees surrounded by taller trees or a dry ditch. Assume a crouched position on the ground with only the balls of your feet touching the ground. Wrap your arms around your knees and lower your head. Minimize contact to the ground since lightning often travels through the ground.**

**Avoid:** Tall trees or objects like light poles or flagpoles, individual trees, standing pools of water and open fields. Also avoid being the highest object on the field. Do not take shelter under trees. Avoid bathrooms if another building is available, and do not use a land-line telephone. A cellular phone or portable phone is a safe alternative if in a secure shelter or vehicle.

**Resuming Activity:** The NSSL (National Severe Storms Laboratory) recommends that everyone should wait at least 30 minutes after the last flash of lightning or sound of thunder before returning to the field or activity.

# Wet Bulb Globe Temperature <sup>®</sup>

These requirements represent minimum standards that IHSA member schools must follow for all athletic activities and competitions, both outdoors and indoor facilities that are not airconditioned. Schools with more restrictive guidelines are not expected to modify any pre-existing guidelines in order to meet this policy. These guidelines will also be used by managers or their designees at all IHSA state series events when the Wet Bulb Globe Temperature (WBGT) is above 80 degrees Fahrenheit. Decisions to suspend and resume activity will be in accordance with these guidelines.

## Pre-Practice Preparation:

1. Thirty minutes prior to the start of an activity, and minimally every 30 minutes after the start of the activity, temperature and humidity readings will be taken at the site of the activity. Using a Wet Bulb Globe Thermometer is required.
- a. Record the readings in writing and maintain the information in files of the tournament manager and/or host school administration. Tournament managers may designate someone other than themselves to take these readings.
2. Provide cooling stations such as shade, ice towels, misting fans, etc. for before, during, and after activity.
3. Provide ample amounts of water. This means water should always be available and athletes should be able to take in as much water as they desire.

Use the Table 1 (see below) with an on-site WBGT reading for appropriate exercise modifications during exercising in the heat:

Cat 2	Activity Guidelines
< 79.9	Normal Activities – Provide at least three separate rest breaks each hour with a minimum duration of 3 min each during the workout.
80.0 - 84.5	Use discretion for intense or prolonged exercise; Provide at least three separate rest breaks each hour with a minimum duration of 5 min each. Cold Water Immersion must be available. (see below)
84.6- 87.5	Maximum practice time is 2 h. Contests may conclude if the temperature moves to orange mid-game with the required breaks provided. No new contests may be started if the temperature is in this range. <u>For Football:</u> players are restricted to helmet, shoulder pads, and shorts during practice. If the WBGT rises to this level during practice, players may continue to work out wearing football pants without changing to shorts. <u>For All Sports:</u> There must be 20 min of rest breaks distributed throughout each hour of practice. Cold Water Immersion must be available. (see below)
87.6 - 89.9	Maximum practice time is 1 h. <u>For Football:</u> No protective equipment may be worn during practice, and there may be no conditioning activities. <u>For All Sports:</u> There must be 20 min of rest breaks distributed throughout the hour of practice. Cold Water Immersion must be available. (see below) Consider postponing games or practices until a cooler time of day.
> 89.9	No outdoor workouts. Delay practice until a cooler WBGT is reached. Table 1 (all temperature readings as measured by WBGT devise)

## Treatment of Exertional Heat Stroke and Cold-Water Immersion:

In the event of potential Exertional Heat Stroke (EHS), each school participating in interscholastic sports shall be properly prepared and equipped to activate EMS and initiate rapid whole-body cooling using an evidence-based cooling modality. The current best practice for the treatment of exertional heat stroke is rapid whole-body cooling via Cold Water Immersion (CWI) on-site followed by transport to advanced medical care (Cool first transport second). If whole-body CWI is not readily available, alternate evidence-based whole-body cooling techniques can be utilized (e.g. TACO method). The best practices shall be carried out by a licensed athletic trainer, designated healthcare provider, or EMS provider. In the event that these medical providers are not available and heat illness is suspected, cooling should be initiated until advanced medical personnel arrives.

The cooling modality shall be ready for immediate use when WBGT is at or above 80F. At WBGT temperatures below 80F the cooling modality should be readily available.

# Cooling Methods Due to Heat Related Illness

Exertional heat stroke (EHS) is relatively uncommon among exercise associated medical conditions but is a frequent cause of exercise related death. The majority of evidence shows that early institution of body cooling is the most effective method of decreasing mortality in EHS. The following contains recommendations regarding the methods of body cooling, including tubs, ice bags, iced towels (towels with water that have been frozen) water, fans, and shade. The recommendations are classified as essential (foundational to the implementation of treatment, should have resources and personnel directed towards implementation), and desirable (important in maximal implementation, should have resources and personnel directed towards implementation as budget and resources allow). The recommendations are only guidelines, are not intended as a standard of care, and should not be considered as such. These guidelines should only be considered in the care of athletes who can be expected to be at risk of EHS due to the sport or the environmental situation of the activity. Sports especially at risk include football with and without equipment, soccer, and long distance track. Other sports and activities, such as cycling, golf, baseball, tennis, track and field, and band, may also be at risk due to long duration exposure to extreme environmental conditions.

It is essential that member schools and school administrators/officials:

- Establish a written plan coordinated with local EMS for emergency treatment of EHS that includes transport to a hospital and conduct drills in the implementation of the plan as practicable.
- Know how to assess environmental conditions and determine when extreme conditions exist.
- Identify a specific spot at the athletic facility that has shade.
- Have immediate access to ice and bags to contain ice.
- Have access to water, and provide water breaks as outlined in the IHSA Managing Heat and Humidity Policy.
- Know the most effective sites for application of ice to the body.
- Obtain and use, when environmental conditions are determined to be extreme, a tub or pool, filled with water and ice before activity begins, to be used in body immersion for maximal cooling, and have personnel trained in this technique.

It is desirable that member schools and school administrators/officials:

- Have a certified athletic trainer (ATC) on staff, as budget and resources allow, to develop and implement these guidelines.
- Have immediate access to water.
- Provide shade breaks.
- Provide fans when environmental conditions are determined to be extreme.
- Have close access to an air conditioned room.
- Have access to and use iced towels that can be rotated to appropriate areas of the body, including the axilla, groin, and back of the neck.

## IHSA Protocol for Implementation of NFHS Sports Playing Rule for Concussions

**“Any athlete who exhibits signs, symptoms, or behaviors consistent with a concussion (such as loss of consciousness, headache, dizziness, confusion, or balance problems) shall be immediately removed from the contest and shall not return to play until cleared by an appropriate health care professional.”**

The above language, which first appeared in all National Federation sports rule books for the 2010-11 school term, reflects a strengthening of rules regarding the safety of athletes suspected of having a concussion, but not a revision in primary responsibilities in these areas. Previous rules required officials to remove any athlete from play who was “unconscious or apparently unconscious.” This revised language reflects an increasing focus on safety, given that the vast majority of concussions do not involve a loss of consciousness. However, the revised language does not create a duty that officials are expected to perform a medical diagnosis. The change in rule simply calls for officials to be cognizant of athletes who display signs, symptoms, or behaviors of a concussion from the lists below and remove them from play.

**NOTE: The persons who should be alert for such signs, symptoms, or behaviors consistent with a concussion in an athlete include appropriate health-care professionals, coaches, officials, parents, teammates, and, if conscious, the athlete him/herself.**

### Definition of a Concussion

A concussion is a traumatic brain injury that interferes with normal brain function. An athlete does not have to lose consciousness (be “knocked out”) to have suffered a concussion.

### Behavior or signs observed indicative of a possible concussion

- Loss of consciousness
- Appears dazed or stunned
- Appears confused
- Forgets plays
- Unsure of game, score, or opponent
- Moves clumsily
- Answers questions slowly
- Shows behavior or personality changes
- Can’t recall events prior to or after the injury

### Symptoms reported by a player indicative of a possible concussion

- Headache
- Nausea
- Balance problems or dizziness
- Double or fuzzy vision
- Sensitivity to light or noise
- Feeling sluggish
- Feeling foggy or groggy
- Concentration or memory problems
- Confusion

This protocol is intended to provide the mechanics to follow during the course of contests/matches/events when an athlete sustains an apparent concussion. For the purposes of this policy, appropriate health care professionals are defined as: physicians licensed to practice medicine in all its branches in Illinois and certified athletic trainers.

1. During the pre-game conference of coaches and officials, the official shall remind the head coaches that a school-approved appropriate health care professional (who meets the description above) will need to clear for return to play any athlete removed from a contest for an apparent head injury.
2. The officials will have no role in determining concussion other than the obvious situation where a player is unconscious or apparently unconscious as is provided for under the previous rule. Officials will merely point out to a coach that a player is apparently injured and advise the coach that the player should be examined by the school-approved health care provider.
3. If it is confirmed by the school’s approved health care professional that the student did not sustain a concussion, the head coach may so advise the officials during an appropriate stoppage of play and the athlete may re-enter competition pursuant to the contest rules.
4. Otherwise, if an athlete cannot be cleared to return to play by a school-approved health care professional as defined in this protocol, that athlete may not be returned to competition that day and is then subject to his or her school’s Return to Play (RTP) protocols before the student-athlete can return to practice or competition.
5. Following the contest, a Special Report shall be filed by the contest official(s) with the IHSA Office through the Officials Center.
6. In cases where an assigned IHSA state finals event medical professional is present, his/her decision to not allow an athlete to return to competition may not be over-ruled.

Additional information regarding concussion has been made available to IHSA member schools and licensed officials and can be accessed on the IHSA Sports Medicine website at <http://www.ihsa.org/Resources/SportsMedicine.aspx>.

## Concussion Information

### Return to Play (RTP) and Return to Learn (RTL)

**Background:** With the start of the 2010-11 school term, the National Federation of State High School Associations (NFHS) implemented a new national playing rule regarding potential head injuries. The rule requires “any player who exhibits signs, symptoms, or behaviors consistent with a concussion (such as loss of consciousness, headache, dizziness, confusion, or balance problems) shall be immediately removed from the game and shall not return to play until cleared by an appropriate health care professional.” In applying that rule in Illinois, it has been determined that only certified athletic trainers, advanced practice nurses (APN), physician’s assistants (PA) and physicians licensed to practice medicine in all its branches in Illinois can clear an athlete to return to play the day of a contest in which the athlete has been removed from the contest for a possible head injury.

*In 2015, the Illinois General Assembly passed the Youth Sports Concussion Safety Act, and this legislation, among other items, required schools to develop Concussion Oversight Teams and create Return to Play (RTP) and Return to Learn (RTL) protocols that student-athletes must meet prior to their full return to athletic or classroom activity*

### Mandatory Concussion Education

Required concussion education for all athletic coaches and marching band directors is another component of the Youth Sports Concussion Safety Act passed by the Illinois General Assembly in the fall of 2015.

The IHSA program includes two video presentations and other supplementary materials that ALL high school athletic coaches, marching band directors, and Concussion Oversight Team members need to review prior to taking a required exam over the curriculum. Individuals will be required to demonstrate proficiency on the exam by scoring at least 80% in order to serve as an athletic coach or marching band director at an IHSA member school.

The program offers training in the subject matter of concussions, including evaluation, prevention, symptoms, risks, and long-term effects. Coaches will be able to access the program after logging into the IHSA Schools Center and clicking on the “CON” tab, which will be located under the ‘Departments’ heading on the Schools Center homepage.

For more information on the Youth Sports Concussion Safety Act, including specific requirements of the law and other concussion education providers besides IHSA, individuals can access Sports Medicine resources on the IHSA website at <http://www.ihsa.org/Resources/SportsMedicine.aspx>.

*For those first adopters of this training, new curriculum from the IHSA/IESA is expected to be released in March of 2018 so those whose training will expire in 2018 will be able to remain in compliance with the law.*

# School's Responsibility: Sportsmanship

## School's Responsibility to an Official Prior To The Season

1. Send a reminder card or email to the officials after you have them scheduled.
2. Reminder should include date of contest, time, level, location and sport.  
Even though many schools and conferences have assignment chairpersons, sending a reminder is highly recommended. When an official does not show, people in your community won't know who the assignment chairperson is, but they do know the athletic director. Avoid embarrassment.
3. Have a standard wage scale set for your different sports and levels and a method in place to raise the pay periodically.
4. If possible, let the working officials know who their partner(s) will be.
5. Hire police and security along with medical assistant or athletic trainer coverage for events whenever possible.
6. Set a policy with your school board on fan, coach and player behavior.
7. Make sure all officials have a contract that is signed by your school—preferably by the principal or IHSA Official Representative.

## School's Responsibility to an Official Prior To The Contest

1. Prior to the contest, provide the officials with directions and inform them of any special activities that might be occurring (i.e., Homecoming, Senior Night, etc.)
2. Give the official a number they can call in case of an emergency or postponement due to weather.
3. Have competent workers assigned at all contests (scorers, announcers, chain crew, etc.). These people are of great assistance to the official during the contest.
4. Have a host assigned to meet the officials as they arrive. The host should do the following for the officials:
  - a. Provide a reserved parking space.
  - b. Meet officials and take them to the dressing room.
  - c. Have refreshments available for halftime and postgame.
  - d. Ask for any additional needs.
  - e. Introduce the officials to those game workers pertinent to the contest (i.e., scorer, announcer, chain gang, etc.).
  - f. Get the proper pronunciation of officials' names so they are correct when given by the public address announcer.
5. Athletic director should discuss with the officials any special events, conference rules, national anthem time, etc. that would affect the game.
6. Provide the officials with the name of the adult supervisor for that contest and where that person can be found in the event a challenging situation should occur.
7. Make officials aware of location of an athletic trainer or other first responders during the contest. Have a doctor on site when possible (especially at football contests).
8. Make sure all bench personnel are properly attired.
9. Do a check on game scoreboards and lighting systems prior to the game or contest.
10. Make sure the playing area is properly marked and meets National Federation guidelines for that contest.
11. Provide appropriate secured dressing area and hot water showering facilities.

## School's Responsibility to an Official During The Contest

1. Insist coaches display good sportsmanship and are proper examples for your players and crowd.
2. Have your public address announcer or cheerleader read the IHSA sportsmanship statement and remain unbiased during contest.
3. Make sure the event supervisor understands the duties and responsibilities pertinent to that contest.
4. Make sure the playing area is maintained during halftime of each contest. For wrestling, make sure the mat is properly cleaned and washed.
5. Help with adverse weather conditions; monitor accordingly.
6. Make sure proper crowd control is visible and in place. Good administrative control can prevent difficult situations.
7. Observe the crowd during the contest and prevent any disturbances that may occur.
8. Work with the official during the game regarding crowd control.
9. Retrieve the game ball at the end of the contest.
10. Escort the officials back to the dressing room at halftime and at the conclusion of the contest.

## School's Responsibility to an Official After The Contest

1. Escort the officials safely back to the dressing room and parking lot.
2. Do not allow unauthorized persons in the dressing room after the game. This includes coaches.
3. Have refreshments available for the officials after the contest.
4. Be sure to thank the officials for their time and effort, regardless of the outcome of the game.
5. Make sure arrangements for paying the officials have been completed. It is preferable to pay the official the day of contest.
6. Ensure that officials are not confronted by anyone after the contest.

### STUDENT MEDIA CREDENTIALS FOR PARTICIPATING SCHOOLS

Congratulations on qualifying for an IHSAA state final in a team sport. In order to provide the best possible coverage of this event for your school newspaper, yearbook and AV club, etc. you are entitled to have up to three students receive credentials to cover this event as official media members. In the event that you have less than three students, an adult sponsor may be included on this list. To apply for student media credentials, please have your Athletic Director or an individual involved with the aforementioned programs email Matt Troha ([mtroha@ihsa.org](mailto:mtroha@ihsa.org)) at the IHSAA with the following information:

- 1) The names of individuals attending
- 2) Whether they are students or adults
- 3) If the attending individuals will serve as reporters, photographers, videographers, etc.

Student media who are registering for credentials are expected to maintain a level of professionalism while covering this event. That includes no cheering while in the press box or game coverage area.

Proper attire is also required. Wearing school shirts and colors is acceptable, but students wearing face paint, costumes, carrying props, etc. will be required to change before receiving credential clearance.

The individual applying for student media credentials will receive specific information on credential pick-up and media regulations at the event via email in the days leading up to the state final.

Please note that student media credentials are only available for state final events in team sports. Due to the sheer volume of schools who qualify in individual sports, our press facilities would be unable to accommodate student media from all participating schools in individual sports. Student media are also welcome to cover IHSAA state final activities. Credentials are not required for these events, but please have your students check-in with state final personnel upon arrival for media coverage regulations.

### VIDEO TAPING STATE FINALS FOR COACH FILM BREAKDOWN

Each school will be eligible to receive a pass for an individual attending the state final event to shoot game film that is for the sole purpose of being used by the coaching staff for postgame breakdown. Passes for videographers shooting highlight videos, documentaries, etc. should be included in student media application reference above. Additional passes for videotaping purposes will need to come from the allotment of state final passes given to school/head coach at or prior to the state final event.

To apply for a credential to shoot video, please have your Athletic Director email Matt Troha ([mtroha@ihsa.org](mailto:mtroha@ihsa.org)) at the IHSAA with the name of the individual who will be taping and whether they are an adult or a student.

*Please contact Matt Troha (309-6336-377) at the IHSAA or any questions related to this document.*

IHSA Tournament Managers/Hosts,

The advent of greater broadcasting technology has brought about many new potential internet broadcasting partners who may contact you seeking to broadcast the postseason IHSA events you host.

The IHSA's official broadcast partner, the NFHS Network, has the first right to exclusively broadcast any postseason IHSA event. If your school streams on the NFHS Network, via either the School Broadcast Program or a fixed Pixellot camera system in your gym or stadium, then you are encouraged to exclusively stream any/all postseason games you host. Additionally, if an NFHS Network school competing in the postseason tournament you are hosting would like to broadcast on the NFHS Network, they should be given exclusivity to do so as well. The NFHS Network also partners with several third party media companies, who should be granted the same exclusivity to broadcast as a school.

If you as the postseason host are not an NFHS Network school, and no competing school contacts you about broadcasting on the NFHS Network, at that point, a third party can be granted the rights to broadcast the event on the internet. In this instance, a broadcast rights fee is due to the IHSA. The internet streaming fee schedule is listed below. Potential broadcasters should be directed to complete and submit the IHSA Broadcast Application form from the IHSA website (TV fee schedule also located in this application), which can be found here:

If at any time you ever have questions on the fees or any other matters related to broadcasting or media, please email/call Matt Troha at the IHSA office ([mtroha@ihssa.org](mailto:mtroha@ihssa.org) or 309-663-6377).

# **Unmanned Aerial Vehicle (Drone) Policy**

**For IHSA Tournaments**

**Effective February 18, 2015**

The use of unmanned aerial vehicles (“UAV”), also known as drones, is prohibited for any purpose by any persons at IHSA tournament venues. Tournament management shall refuse admission or entry to anyone attempting to use a UAV; and if necessary, tournament management shall remove anyone attempting to use a UAV and/or confiscate the UAV until the event has been completed.

For purposes of this policy, a UAV is any aircraft without a human pilot aboard the device.

An exception to this policy may be made in specific cases for IHSA broadcast partners, provided the management of the tournament facility permits the presence of UAVs for broadcast purposes under the control of the IHSA.
