

### **Clarification Regarding Advanced High Superiors That Exceed the Required Twist**

An AHS that exceeds the required twist receives AHS credit (Page 79 and 101). When awarding AHS in the Bonus category performing the same AHS a second time with an additional twist does not necessarily make it different from the listed AHS that was performed first. The **Note** on pages 61 and 86 under Section 5 Difficulty states a  $1/4$  turn does not make an element different unless it is listed separately in the rules book.

There is one exception to the **Note** on Balance Beam only: AHS leaps and jumps listed in the rules book with a  $1/2$  or  $3/4$  twist may be considered different in the Bonus category when an additional  $1/4$  twist is added.

All other AHS elements listed in the rules book with a  $1/1$ ,  $1\ 1/2$ , or  $2/1$  twist or more must add a minimum  $1/2$  twist to the listed AHS to be considered different. Adding a  $1/4$  twist may be awarded an AHS in Difficulty but will not make the element different when awarding AHS's in the Bonus category.
