SCHOOL'S RESPONSIBILITY TO AN OFFICIAL PRIOR TO THE SEASON

1. Send a reminder card or email to the officials after you have them scheduled.
2. Reminder should include date of contest, time, level, location and sport.

Even though many schools and conferences have assignment chairpersons, sending a reminder is highly recommended. When an official does not show, people in your community won't know who the assignment chairperson is, but they do know the athletic director. **Avoid embarrassment.**

3. Have a standard wage scale set for your different sports and levels and a method in place to raise the pay periodically.
4. If possible, let the working officials know who their partner(s) will be.
5. Hire police and security along with medical assistant or athletic trainer coverage for events whenever possible.
6. Set a policy with your school board on fan, coach and player behavior.
7. Make sure all officials have a contract that is signed by your school—preferably by the principal or IHSA Official Representative.

SCHOOL'S RESPONSIBILITY TO AN OFFICIAL PRIOR TO THE CONTEST

1. Prior to the contest, provide the officials with directions and inform them of any special activities that might be occurring (i.e., Homecoming, Senior Night, etc.)
2. Give the official a number they can call in case of an emergency or postponement due to weather.
3. Have competent workers assigned at all contests (scorers, announcers, chain crew, etc.). These people are of great assistance to the official during the contest.
4. Have a host assigned to meet the officials as they arrive. The host should do the following for the officials:
 - A) Provide a reserved parking space.
 - B) Meet officials and take them to the dressing room.
 - C) Have refreshments available for halftime and postgame.
 - D) Ask for any additional needs.
 - E) Introduce the officials to those game workers pertinent to the contest (i.e., scorer, announcer, chain gang, etc.).
 - F) Get the proper pronunciation of officials' names so they are correct when given by the public address announcer.
5. Athletic director should discuss with the officials any special events, conference rules, national anthem time, etc. that would affect the game.
6. Provide the officials with the name of the adult supervisor for that contest and where that person can be found in the event a challenging situation should occur.
7. Make officials aware of location of an athletic trainer or other first responders during the contest. Have a doctor on site when possible (especially at football contests).
8. Make sure all bench personnel are properly attired.
9. Do a check on game scoreboards and lighting systems prior to the game or contest.
10. Make sure the playing area is properly marked and meets National Federation guidelines for that contest.
11. Provide appropriate secured dressing area and hot water showering facilities.

SCHOOL'S RESPONSIBILITY TO AN OFFICIAL DURING THE CONTEST

1. Insist coaches display good sportsmanship and are proper examples for your players and crowd.
2. Have your public address announcer or cheerleader read the IHSA sportsmanship statement and remain unbiased during contest.
3. Make sure the event supervisor understands the duties and responsibilities pertinent to that contest.
4. Make sure the playing area is maintained during halftime of each contest. For wrestling, make sure the mat is properly cleaned and washed.
5. Help with adverse weather conditions; monitor accordingly.
6. Make sure proper crowd control is visible and in place. Good administrative control can prevent difficult situations.
7. Observe the crowd during the contest and prevent any disturbances that may occur.
8. Work with the official during the game regarding crowd control.
9. Retrieve the game ball at the end of the contest.
10. Escort the officials back to the dressing room at halftime and at the conclusion of the contest.

SCHOOL'S RESPONSIBILITY TO AN OFFICIAL AFTER THE CONTEST

1. Escort the officials safely back to the dressing room and parking lot.
2. Do not allow unauthorized persons in the dressing room after the game. This includes coaches.
3. Have refreshments available for the officials after the contest.
4. Be sure to thank the officials for their time and effort, regardless of the outcome of the game.
5. Make sure arrangements for paying the officials have been completed. It is preferable to pay the official the day of contest.
6. Ensure that officials are not confronted by anyone after the contest.

Heat Stress and Athletic Participation

Practices are conducted in very hot and humid weather in many parts of the United States. There are no excuses for heat stroke deaths if the proper precautions are taken. During hot weather, the athlete is subject to the following:

The following is by Dr. Frederick O. Mueller, University of North Carolina

Heat Cramps - painful cramps involving abdominal muscles and extremities caused by intense, prolonged exercise in the heat and depletion of salt and water due to profuse sweating.

Heat Syncope - weakness, fatigue and fainting due to loss of salt and water in sweat and exercise in the heat. Predisposes to heatstroke.

Heat Exhaustion (Water Depletion) - excessive weight loss, reduced sweating, elevated skin and core body temperature, excessive thirst, weakness, headache and sometimes unconsciousness.

Heat Exhaustion (Salt Depletion) - exhaustion, nausea, vomiting, muscle cramps, and dizziness due to profuse sweating and inadequate replacement of body salts.

Heat Stroke - an acute medical emergency related to thermoregulatory failure. Associated with nausea, seizures, disorientation, and possible unconsciousness or coma. It may occur suddenly without being preceded by any other clinical signs. The individual is usually unconscious with a high body temperature and a hot dry skin (heatstroke victims, contrary to popular belief, may sweat profusely).

It is believed that the above mentioned heat stress problems can be controlled provided certain precautions are taken. According to the American Academy of Pediatrics Committee on Sports Medicine, heat related illnesses are all preventable. (Sports Medicine: Health Care for Young Athletes, American Academy of Pediatrics, 1991). The following practices and precautions are recommended:

1. Each athlete should have a physical examination with a medical history when first entering a program and an annual health history update. History of previous heat illness and type of training activities before organized practice begins should be included. State High School Association's recommendations should be followed.
2. It is clear that top physical performance can only be achieved by an athlete who is in top physical condition. Lack of physical fitness impairs the performance of an athlete who participates in high temperatures. Coaches should know the **physical condition** of their athletes and set practice schedules accordingly.
3. Along with physical conditioning, the factor of acclimatization to heat is important. Acclimatization is the process of becoming adjusted to heat and it is essential to provide for **gradual acclimatization to hot weather**. It is necessary for an athlete to exercise in the heat if he/she is to become acclimatized to it. It is suggested that a graduated physical conditioning program be used and that 80% acclimatization can be expected to occur after the first 7-10 days. Final stages of acclimatization to heat are marked by increased sweating and reduced salt concentration in the sweat.
4. The old idea that water should be withheld from athletes during workouts **has no scientific foundation**. The most important safeguard to the health of the athlete is the replacement of water. Water must be on the field and readily available to the athletes at all times. It is recommended that a minimum of 10-minutes should be scheduled for a water break every half hour of heavy exercise in the heat. **Water should be available in unlimited quantities**. Check and be sure athletes are drinking the water. Cold water is preferable. Drinking ample water before practice or games has also been found to aid performance in the heat.
5. Salt should be replaced daily. Modest salting of foods after practice or games will accomplish this purpose. Salt tablets are not recommended. **Attention must be directed to replacing water - fluid replacement is essential**.
6. Cooling by evaporation is proportional to the area of the skin exposed. In extremely hot and humid weather reduce the amount of clothing covering the body as much as possible. **Never use rubberized clothing**.
7. Athletes should weigh each day before and after practice and **weight charts checked**. Generally a 3 percent weight loss through sweating is safe and over a 3 percent weight loss is in the danger zone. Over a 3 percent weight loss the athlete should not be allowed to practice in hot and humid conditions. Observe the athletes closely under all conditions. Do not allow athletes to practice until they have adequately replaced their weight.
8. Observe athletes carefully for signs of trouble, particularly athletes who lose significant weight and the eager athlete who constantly competes at his/her capacity. Some trouble signs are nausea, incoherence, fatigue, weakness, vomiting, cramps, weak rapid pulse, visual disturbance and unsteadiness.
9. Teams that encounter hot weather during the season through travel or following an unseasonably cool period should be physically fit but will not be environmentally fit. Coaches in this situation should follow the above recommendations and substitute more frequently during games.
10. Know what to do in case of an emergency and have your emergency plans written with copies to all your staff. Be familiar with immediate first aid practice and pre-arranged procedures for obtaining medical care, including ambulance service.

HEAT STROKE: THIS IS A MEDICAL EMERGENCY - DELAY COULD BE FATAL. Immediately cool body while waiting for transfer to a hospital. Remove clothing and place ice bags on the neck, in the axilla (armpit), and on the groin area. An increasing number of medical personnel are now using a treatment for heat illness that involves applying either alcohol or cool water to the victim's skin and vigorously fanning the body. The fanning causes evaporation and cooling. (Source - the First Aider - September 1987)

HEAT EXHAUSTION: OBTAIN MEDICAL CARE AT ONCE. Cool body as you would for heat stroke while waiting for transfer to hospital. Give fluids if athlete is able to swallow and is conscious.

SUMMARY: The main problem associated with exercising in the hot weather is water loss through sweating. Water loss is best replaced by allowing the athlete unrestricted access to water. Water breaks two or three times per hour are better than one break an hour. Probably the best method is to have water available at all times and to allow the athlete to drink water whenever he/she needs it. Never restrict the amount of water an athlete drinks, and be sure the athletes are drinking the water. The small amount of salt lost in sweat is adequately replaced by salting food at meals. Talk to your medical personnel concerning emergency treatment plans.

Managing Heat and Heat Illness

These guidelines represent minimum standards that IHSA member schools should follow for athletic competitions. Schools with more restrictive guidelines are not expected to modify any pre-existing guidelines in order to meet this policy. These guidelines will be used by managers or their designees at all IHSA state series events when the Wet Bulb Globe Temperature (WBGT) is above 80 degrees Fahrenheit. State series tournament managers will make the decisions to suspend and resume activity in accordance with these guidelines using those devices or systems usually used at the state series venue/site.

1. Thirty minutes prior to the start of an activity, and again 60 minutes after the start of the activity, temperature and humidity readings will be taken at the site of the activity. Using a Wet Bulb Globe Thermometer is recommended, although a conversion to WBGT can be made from air temperature and relative humidity using chart 2. Record the readings in writing and maintain the information in files of the tournament manager and/or host school administration. Tournament managers may designate someone other than themselves to take these readings.

Use the Table 1 (see below) with an on-site WBGT reading for appropriate exercise modifications during exercising in the heat:

Table 1

a. ≤79.9 degrees F

- i. All sports
 1. Provide ample amounts of water. This means that water should always be available and athletes should be able to take in as much water as they desire.
 2. Optional water breaks every 30 minutes for 10 minutes in duration. Coordinate breaks with assigned contest officials.
 3. Ice-down towels for cooling.
 4. Watch/monitor athletes carefully for necessary action.

 1. Helmets and other possible equipment removed while not involved in contact.
- iii. Reduce time of outside activity. Consider postponing activity to later in the day.
- iv. Recheck air temperature and humidity every 30 minutes to monitor for increased heat conditions or sooner if personnel on the field suspects potential heat stress.

 5. Watch/monitor athletes carefully for necessary action
 6. Reduce time of outside activity as well as indoor activity if air conditioning is unavailable.

 - 1. Helmets and other possible equipment removed if not involved in activity or necessary for safety. If necessary for safety, suspend activity.
- iii. Recheck air temperature and humidity every 30 minutes to monitor for increased heat conditions.

e. 90 degrees F

- i. All sports
 - 1. No training/competition
 - 2. Cancel and/or postpone activity to cooler time of the day

NOTE: While most attention will be given to outdoor sports in the fall and spring, indoor venues/facilities (gymnasiums, wrestling rooms, and swimming/diving facilities) that are not air conditioned should not be neglected for the purposes of this policy. Additionally, sometimes conditions will vary for different aspects of the same competition. For example, one part of a cross-country course may be hotter or more humid than other parts. The best course of action for managers is to take a WBGT reading at the place of the most severe conditions.

Cooling Methods Due to Heat Related Illness

Exertional heat stroke (EHS) is relatively uncommon among exercise associated medical conditions, but is a frequent cause of exercise related death. The majority of evidence shows that early institution of body cooling is the most effective method of decreasing mortality in EHS. The following contains recommendations regarding the methods of body cooling, including tubs, ice bags, iced towels (towels with water that have been frozen) water, fans, and shade. The recommendations are classified as essential (foundational to the implementation of treatment, should have resources and personnel directed towards implementation), and desirable (important in maximal implementation, should have resources and personnel directed towards implementation as budget and resources allow). The recommendations are only guidelines, are not intended as a standard of care, and should not be considered as such. These guidelines should only be considered in the care of athletes who can be expected to be at risk of EHS due to the sport or the environmental situation of the activity. Sports especially at risk include football with and without equipment, soccer, and long distance track. Other sports and activities, such as cycling, golf, baseball, tennis, track and field, and band, may also be at risk due to long duration exposure to extreme environmental conditions.

It is essential that member schools and school administrators/officials:

- Establish a written plan coordinated with local EMS for emergency treatment of EHS that includes transport to a hospital and conduct drills in the implementation of the plan as practicable.
- Know how to assess environmental conditions and determine when extreme conditions exist.
- Identify a specific spot at the athletic facility that has shade.
- Have immediate access to ice and bags to contain ice.
- Have access to water, and provide water breaks as outlined in the IHSA Managing Heat and Humidity Policy.
- Know the most effective sites for application of ice to the body.
- Obtain and use, when environmental conditions are determined to be extreme, a tub or pool, filled with water and ice before activity begins, to be used in body immersion for maximal cooling, and have personnel trained in this technique.

It is desirable that member schools and school administrators/officials:

- Have a certified athletic trainer (ATC) on staff, as budget and resources allow, to develop and implement these guidelines.
- Have immediate access to water.
- Provide shade breaks.
- Provide fans when environmental conditions are determined to be extreme.
- Have close access to an air conditioned room.
- Have access to and use iced towels that can be rotated to appropriate areas of the body, including the axilla, groin, and back of the neck.

IHSA Severe Weather Safety Guidelines

To be used during any IHSA state series contest

When thunder is heard, or a cloud-to-ground lightning bolt is seen, the thunderstorm is close enough to strike your location with lightning. Take shelter immediately.

Lightning is one of the most consistent and underrated causes of weather-related deaths or injury in the United States. Nearly all lightning-related injuries occur between the months of May and September and between the hours of 10:00 a.m. and 7:00 p.m. Therefore, the greatest concern for injuries in an outdoor contest appears to be during that time, though it can happen any time of year.

It is essential that local managers, competing schools, and contest officials establish dialogue in advance of contests or events to ensure that all involved are aware of what the plan will be in determining whether or when to suspend play. Local managers are encouraged to share their plan with competing schools and assigned contest officials *prior to the start of the tournament/event*.

Advance Planning:

Local Managers should have a documented plan in place, designated people who are responsible for monitoring the weather and a qualified person (typically a trained manager and/or officials) to make the decision to suspend play. In state series competitions, the local tournament manager or official(s), if assigned, can make the decision to suspend play.

Monitoring Weather:

Local Managers during the contest should be aware of any potential thunderstorms that may form during the competition; if an evacuation is needed, managers should also know how long it would take teams to get to their safest location. Monitoring the weather with a weather alert radio, or with lightning detection systems, or any other available means, is recommended.

If competing schools have portable devices they will be bringing to a contest/event and/or have specific policy or directions from their administration that they must follow, the school must communicate those to the tournament manager. Tournament managers must know the policies of each school assigned to their tournament or event prior to its start.

Lightning Awareness

Generally speaking, it is felt that anytime a cloud-to-ground strike of lightning can be seen, or thunder heard, risk is already present. It is time to seek shelter.

Criteria for Suspending Play

If the local management does not have commercial weather warning equipment at the site or an efficient method of making an accurate, timely decision on location, listening for thunder is the best way to mitigate the danger. If thunder is heard, or lightning is seen hitting the ground, the thunderstorm is close enough to strike in your location. According to the National Weather Service, lightning can strike 10 miles away from the parent thunderstorm. When thunder roars, go indoors! It is important that local manager monitor not only how far away the lightning is but also how fast it is approaching. Thunderstorms can form and move quickly and danger can arrive quickly.

Either tournament/event management or assigned contest officials have the authority to suspend or cancel interscholastic contests. It is recommended that those groups work together in making such determination and use any and all available information in doing so. Participating schools with concerns at particular events should direct those to tournament/event management or assigned contest officials.

The following guidelines should be followed in determining when to suspend an event:

1. Anytime a cloud-to-ground strike of lightning can be seen, or thunder heard, risk is present, and a contest should be suspended. At that point, the 30 minute rule for resumption should go into effect.
NOTE: Due to the layout of some outdoor facilities, contest officials or tournament managers may not be able to see lightning actually "strike the ground." However, whenever lightning is seen moving out of clouds towards the ground, it can be assumed that the lightning is, in fact, striking the ground somewhere, and, as a result, the contest should be suspended.
2. If lightning or thunder is not present but the weather is starting to become ominous, tournament management and/or contest officials should use all available information to determine if and when a contest should be suspended. Care for both participants and spectators should be taken into account at this point. If in doubt, contest officials or tournament managers are encouraged to exercise caution and suspend play. At such a point, tournament officials should be ready to implement their emergency plans. However, competing schools who pull their teams or athletes off a field of competition prior to a contest or event's suspension do so at the risk of forfeiture or disqualification from the game or event.
3. Suspended contests or events should be resumed at a time when the weather and/or field conditions allow for resumption.

Evacuation Plan

Safe Areas: All personnel, athletes and spectators should be clearly informed of available safe structures or shelters in the event a thunderstorm approaches. A safe structure is any fully enclosed building frequently used by people. In absence of that – athletes and spectators should go to any vehicle with a hard metal roof. Roll up the windows and do not touch the sides of the vehicle. If no safe structure or vehicle is available, find a thick grove of small trees surrounded by taller trees or a dry ditch. Assume a crouched position on the ground with only the balls of your feet touching the ground. Wrap your arms around your knees and lower your head. Minimize contact to the ground since lightning often travels through the ground.

Avoid: Tall trees or objects like light poles or flagpoles, individual trees, standing pools of water and open fields. Also avoid being the highest object on the field. Do not take shelter under trees. Avoid bathrooms if another building is available, and do not use a land-line telephone. A cellular phone or portable phone is a safe alternative if in a secure shelter or vehicle.

Resuming Activity

The NSSL (National Severe Storms Laboratory) recommends that everyone should wait at least 30 minutes after the last flash of lightning or sound of thunder before returning to the field or activity.

Emergency Action Plan (EAP)

In accordance with By-law 2.150, a school shall have on file for each student that participates (including practice) in interscholastic athletics a certificate of physical fitness issued by a licensed physician, physician's assistant or nurse practitioner as set forth in the Illinois State Statutes not more than 395 days preceding any date of participation in any such practice, contest or activity. As this By-law addresses pre-participation certification only, there is not a guideline or By-law in place to address release to interscholastic activity following an injury, with the exception of head injury/concussion. With the understanding that schools throughout the state have different needs and services available to them, this document was produced to provide guidelines on an athlete's return to activity following an injury.

Each school should have a written Emergency Action Plan (EAP) in place to address medical emergencies among athletes, staff, officials, and spectators, regardless of severity, occurring during a practice or competition. The plan should also address severe weather, fire, electrical failure, bomb threat, criminal behavior, or other possible emergencies. This plan should be developed to address the unique needs of the individual sport and venue.

EAP's should consist of the following components:

- Personnel
- Communication
- Equipment
- Emergency Medical Care
- Player Medical Information
- Game-day Responsibilities (includes appropriate sideline preparedness)
- Catastrophic Incident Plan

While each school's sports medicine/medical service needs and availability are different, guidelines should also be developed to assist the coaching staff on what injuries should be allowed to return to competition without a medical release. It is not practical to identify every situation or injury; however the following guidelines should assist the school/coaching staff on determining if the athlete should be allowed to return to activity without a release.

1. No swelling or deformity.
2. No headache, nausea, blurred vision, tingling, numbness or sensory changes.
3. Symmetrical (equal to the other side) joint range on motion and strength.
4. Ability to bear weight, without a limp, if injury occurs to the lower body.
5. Ability to complete full functional sporting activities without compensation.

Please remember that the majority of high school athletes are a minor. If there is a question as to their injury and ability to participate, the parents/guardian should be consulted.

Athletes that are unable to meet the above criteria should be encouraged to seek medical treatment prior to return to interscholastic activity. Those athletes that seek medical treatment should be required to provide a written medical release indicating their ability to participate. Without obtaining this release, the school may assume legal liability if the athlete is allowed to participate in activities not permitted by their medical provider.

A proper plan establishes accountability, should be comprehensive, yet flexible, practical, and easily understood. The written EAP must be revised, approved, distributed, and should be rehearsed regularly prior to every athletic season. The athletic department, administration, and sports medicine team share the responsibility to establish, practice, and execute the EAP.

IHSA Protocol for Implementation of NFHS Sports Playing Rule for Concussions

“Any athlete who exhibits signs, symptoms, or behaviors consistent with a concussion (such as loss of consciousness, headache, dizziness, confusion, or balance problems) shall be immediately removed from the contest and shall not return to play until cleared by an appropriate health care professional.”

The above language, which first appeared in all National Federation sports rule books for the 2010-11 school term, reflects a strengthening of rules regarding the safety of athletes suspected of having a concussion, but not a revision in primary responsibilities in these areas. Previous rules required officials to remove any athlete from play who was “unconscious or apparently unconscious.” This revised language reflects an increasing focus on safety, given that the vast majority of concussions do not involve a loss of consciousness. However, the revised language does not create a duty that officials are expected to perform a medical diagnosis. The change in rule simply calls for officials to be cognizant of athletes who display signs, symptoms, or behaviors of a concussion from the lists below and remove them from play.

NOTE: The persons who should be alert for such signs, symptoms, or behaviors consistent with a concussion in an athlete include appropriate health-care professionals, coaches, officials, parents, teammates, and, if conscious, the athlete him/herself.

Definition of a Concussion

A concussion is a traumatic brain injury that interferes with normal brain function. An athlete does not have to lose consciousness (be “knocked out”) to have suffered a concussion.

Behavior or signs observed indicative of a possible concussion

- Loss of consciousness
- Appears dazed or stunned
- Appears confused
- Forgets plays
- Unsure of game, score, or opponent
- Moves clumsily
- Answers questions slowly
- Shows behavior or personality changes
- Can’t recall events prior to or after the injury

Symptoms reported by a player indicative of a possible concussion

- Headache
- Nausea
- Balance problems or dizziness
- Double or fuzzy vision
- Sensitivity to light or noise
- Feeling sluggish
- Feeling foggy or groggy
- Concentration or memory problems
- Confusion

This protocol is intended to provide the mechanics to follow during the course of contests/matches/events when an athlete sustains an apparent concussion. For the purposes of this policy, appropriate health care professionals are defined as: physicians licensed to practice medicine in all its branches in Illinois and certified athletic trainers.

1. During the pre-game conference of coaches and officials, the official shall remind the head coaches that a school-approved appropriate health care professional will need to clear for return to play any athlete removed from a contest for an apparent head injury.
2. The officials will have no role in determining concussion other than the obvious situation where a player is unconscious or apparently unconscious as is provided for under the previous rule. Officials will merely point out to a coach that a player is apparently injured and advise the coach that the player should be examined by the school-approved health care provider.
3. If it is confirmed by the school’s approved health care professional that the student did not sustain a concussion, the head coach may so advise the officials during an appropriate stoppage of play and the athlete may re-enter competition pursuant to the contest rules.
4. Otherwise, if an athlete can not be cleared to return to play by a school-approved health care professional as defined in this protocol, that athlete may not be returned to competition that day and is then subject to the IHSA’s Return to Play (RTP) Policy before the student-athlete can return to practice or competition.
5. Following the contest, a Special Report shall be filed by the contest official(s) with the IHSA Office through the Officials Center.
6. In cases where an assigned IHSA state finals event medical professional is present, his/her decision to not allow an athlete to return to competition may not be over-ruled.

Additional information regarding concussion has been made available to IHSA member schools and licensed officials and can be accessed on the IHSA Sports Medicine website at <http://www.ihsa.org/Resources/SportsMedicine.aspx>.

Concussion Information

Return to Play (RTP) Policy

Background: With the start of the 2010-11 school term, the National Federation of State High School Associations (NFHS) implemented a new national playing rule regarding potential head injuries. The rule requires “any player who exhibits signs, symptoms, or behaviors consistent with a concussion (such as loss of consciousness, headache, dizziness, confusion, or balance problems) shall be immediately removed from the game and shall not return to play until cleared by an appropriate health care professional.” In applying that rule in Illinois, it has been determined that only certified athletic trainers and physicians licensed to practice medicine in all its branches in Illinois can clear an athlete to return to play the day of a contest in which the athlete has been removed from the contest for a possible head injury.

Policy: In cases when an athlete is not cleared to return to play the same day as he/she is removed from a contest following a possible head injury (i.e., concussion), the athlete shall not return to play or practice until the athlete is evaluated by and receives written clearance from a licensed health care provider to return to play.

For the purposes of this policy, licensed health care providers consist of physicians licensed to practice medicine in all its branches in Illinois and certified athletic trainers working in conjunction with physicians licensed to practice medicine in all its branches in Illinois.

Mandatory Concussion Education

Required concussion education for all athletic coaches and marching band directors is a component of the Youth Sports Concussion Safety Act passed by the Illinois General Assembly in the fall of 2015.

The IHSA program includes two video presentations and other supplementary materials that ALL high school athletic coaches, marching band directors, and Concussion Oversight Team members need to review prior to taking a required exam over the curriculum. Individuals will be required to demonstrate proficiency on the exam by scoring at least 80% in order to serve as an athletic coach or marching band director at an IHSA member school.

The program offers training in the subject matter of concussions, including evaluation, prevention, symptoms, risks, and long-term effects. Coaches will be able to access the program after logging into the IHSA Schools Center and clicking on the “CON” tab, which will be located under the ‘Departments’ heading on the Schools Center homepage.

For more information on the Youth Sports Concussion Safety Act, including specific requirements of the law and other concussion education providers besides IHSA, individuals can access Sports Medicine resources on the IHSA website at <http://www.ihsa.org/Resources/SportsMedicine.aspx>.

Unmanned Aerial Vehicle (Drone) Policy

For IHSA Tournaments

Effective February 18, 2015

The use of unmanned aerial vehicles (“UAV”), also known as drones, is prohibited for any purpose by any persons at IHSA tournament venues. Tournament management shall refuse admission or entry to anyone attempting to use a UAV; and if necessary, tournament management shall remove anyone attempting to use a UAV and/or confiscate the UAV until the event has been completed.

For purposes of this policy, a UAV is any aircraft without a human pilot aboard the device.

An exception to this policy may be made in specific cases for IHSA broadcast partners, provided the management of the tournament facility permits the presence of UAVs for broadcast purposes under the control of the IHSA.

GIRL SOFTBALL SEEDING MEETING INFORMATION

Coaches are expected to take part in the seeding process with the highest standard of integrity and to ensure fairness and equity for all participants. Schools must enter all game schedules and results into Maxpreps.com to be counted toward season summary totals. The head coach from each school should complete the Season Summary Form and will be allowed to vote for the seeds. The Season Summary Form can be found in the Activity Tracker section of the IHSA Schools Center under the 'Required Data Forms' column for Softball.

Coaches will not be allowed to vote for their own team. Coaches will determine their seeds based on these factors:

- Head to head victories against teams assigned to the first level tournament
- Record against common opponents
- The total win/loss record of schools in the tournament, and
- Team evaluation based on narrative provided by coaches

These factors have not been prioritized. The IHSA reserves the right to review all submitted seeds and throw out ballots and adjust the seeds accordingly.

In the event that schools tie for a seed, the IHSA will use the following criteria to break the tie:

- Head to head competition between the tied schools
- Random draw (if more than 2 schools are tied for a seed)
- Coin flip (if 2 schools are tied for a seed and head to head competition can't break the tie)

Schools will be able to access all the seeds made by other schools assigned to their seeding meeting prior to the seeds being posted on-line through the IHSA website. Tournament assignments will then be posted by the end of the week during which seeding occurs. The time table that follows shows the dates for the 2016-17 school term.

A sample of the page in the IHSA Schools Center where you will submit Baseball and Softball scores.

It is the responsibility of each tournament manager to:

- Submit the final score of each contest you host.
- Submit the final score as soon as possible after the conclusion of each contest.

For more information, check out the ScoreZone page at www.ihsa.org/scores

Interactive ScoreZone means live updates!

Submitting scores online means being able to submit scores during the contest. Imagine being able to track scores from dozens of hot games around the state — as they happen. The technology is here. All we need now is your help.

How to Submit "Live Updates"

1. Log on to the IHSA Schools Center and find the contest you want to report (as outlined above).
2. Submit the score and the status of the contest (the inning, or the time remaining in the quarter or the half).
3. Submit the score as often as you like (including, of course, the final score).

Think it's a great idea, but need help? Remember, you can give the ScoreZone password to a trusted student or adult. The ScoreZone password gives access only to the ScoreZone area of the Schools Center. Live updates can be posted from the site of the contest, or even from home while listening to the radio.

No obligation: You are not required to submit "live updates" — but you just might want to!

IHSA State Series Press Box Priority List

IHSA State Series hosts that utilize a Press Box for its contests will need to follow the IHSA State Series Press Box Priority List Policy (Policy 37-C-1) for postseason contests, including football playoff games. Please note that this is a new procedure for the 2010-11 school term that was passed by the IHSA Board of Directors via a recommendation from the IHSA News Media Advisory Committee.

The order below is the preference that should be given when allowing entry and seating to the Press Box for IHSA postseason contests, including football playoff games:

IHSA Press Box Priority List

1. Official Timer
2. Scoreboard Operator
3. Public Address Announcer
4. Public Address Spotter
5. Official Scorer (if applicable)
6. Coaches
7. Home Radio (priority given to season-long coverage or # of games covered
2 individuals per station unless space allows for more)
8. Visitor Radio (priority given to season-long coverage or # of games covered)
2 individuals per station unless space allows for more)
9. Television/Internet Streaming (if approved by IHSA/host)
10. Other radio (2 individuals per station unless space allows for more)
11. Print Media
12. VIPs, fans, boosters, parents, etc.

** Schools may provide media of any kind who have covered their team for all contests throughout the season priority after Coaches (6) and ahead of Home Radio (7). In these instances, home and visiting radio must still be offered press box access, although they can then be limited to one member per station if space dictates.*

***Special areas adjacent or connected to the press box that have been built or functioned specifically as seating for booster clubs or other fans can continue to be used as such. An area in the working press box cannot be designated as a booster/fan area if all of the other members of the Press Box Priority List have not yet been accommodated.*

****The IHSA Press Box Priority List is not applicable for regular-season contests.*

Please contact IHSA Media Relations liaison Matt Troha (mtroha@ihsa.org) with any questions.

STUDENT MEDIA CREDENTIALS FOR PARTICIPATING SCHOOLS

Congratulations on qualifying for an IHSA state final in a team sport. In order to provide the best possible coverage of this event for your school newspaper, yearbook and AV club, etc. you are entitled to have up to three students receive credentials to cover this event as official media members. In the event that you have less than three students, an adult sponsor may be included on this list. To apply for student media credentials, please have your Athletic Director or an individual involved with the aforementioned programs email Matt Troha (mtroha@ihsa.org) at the IHSA with the following information:

- 1) The names of individuals attending
- 2) Whether they are students or adults
- 3) If the attending individuals will serve as reporters, photographers, videographers, etc.

Student media who are registering for credentials are expected to maintain a level of professionalism while covering this event. That includes no cheering while in the press box or game coverage area. Proper attire is also required. Wearing school shirts and colors is acceptable, but students wearing face paint, costumes, carrying props, etc. will be required to change before receiving credential clearance.

The individual applying for student media credentials will receive specific information on credential pick-up and media regulations at the event via email in the days leading up to the state final.

Please note that student media credentials are only available for state final events in team sports. Due to the sheer volume of schools who qualify in individual sports, our press facilities would be unable to accommodate student media from all participating schools in individual sports. Student media are also welcome to cover IHSA state final activities. Credentials are not required for these events, but please have your students check-in with state final personnel upon arrival for media coverage regulations.

VIDEO TAPING STATE FINALS FOR COACH FILM BREAKDOWN

Each school will be eligible to receive a pass for an individual attending the state final event to shoot game film that is for the sole purpose of being used by the coaching staff for postgame breakdown. Passes for videographers shooting highlight videos, documentaries, etc. should be included in student media application reference above. Additional passes for videotaping purposes will need to come from the allotment of state final passes given to school/head coach at or prior to the state final event.

To apply for a credential to shoot video, please have your Athletic Director email Matt Troha (mtroha@ihsa.org) at the IHSA with the name of the individual who will be taping and whether they are an adult or a student.

Please contact Matt Troha (309-663-6377) at the IHSA for any questions related to this document.
